

SOUMYADIP OJHA

Software Engineer — Systems Test & Full-Stack Development

Kolkata, West Bengal • +91 8670226518 • soumyadipojha635@gmail.com • linkedin.com/in/soumyadip-ojha • github.com/soumyadipojha

PROFESSIONAL SUMMARY

Full-Stack Software Development Engineer with a strong foundation in building scalable, production-grade applications across the MERN stack and PostgreSQL. Experienced in delivering enterprise solutions for US clients, designing RESTful APIs, and architecting systems that are reliable, maintainable, and performant under real-world load. Brings a working understanding of systems-level thinking — including performance benchmarking, distributed architectures, and cloud-based infrastructure — developed through hands-on project delivery and client-facing engineering work. Collaborative by nature, comfortable in Agile environments, and effective at translating technical findings into clear outcomes for stakeholders. Avid gamer with a genuine passion for the industry and a drive to contribute to platforms that power great player experiences.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), C++, Java (OOP), SQL, HTML5, CSS3
- **Frontend:** React.js, Redux, Tailwind CSS, Daisy UI, Figma
- **Backend:** Node.js, Express.js, RESTful API Design, JWT Authentication, Scalable Architecture
- **Databases:** MongoDB Atlas, PostgreSQL, MySQL, Redis, Mongoose ODM
- **Enterprise & BI:** SAP Crystal Reports, IBM Cognos, Microsoft Fabric, Power Automate, Telerik
- **Tools & Workflow:** Git, GitHub, Jira, Azure DevOps (ADO), Postman, Agile/Scrum, SDLC
- **Core CS:** Data Structures & Algorithms, OOP, System Design, Distributed Systems (fundamentals)

WORK EXPERIENCE

Associate Software Engineer | **Kanerika Software Inc.** *Aug 2025 – Present • Remote — US Client Facing*

- Designed and delivered production-ready full-stack applications using React.js, Node.js + Express.js, MongoDB, and PostgreSQL for enterprise clients McKesson, Unisys, Apollo, and Zydus, ensuring scalable platform architecture and end-to-end system reliability.
- Performed system-level performance analysis and built RESTful APIs integrated with React dashboards for real-time data visualisation and monitoring using Prometheus-like reporting pipelines — improving client operational visibility by 40%.
- Wrote optimised PostgreSQL queries and designed normalised schemas for high-volume transactional data; leveraged MongoDB Atlas for flexible document-based storage, with a focus on query performance and throughput benchmarking.
- Implemented BI and reporting solutions with SAP Crystal Reports, IBM Cognos, and Microsoft Fabric; automated workflows with Power Automate and Telerik, reducing manual operational effort by 50%.
- Collaborated cross-functionally in Agile sprints using Jira and Azure DevOps (ADO) — participated in daily stand-ups, tracked and resolved issues, conducted code reviews, and shipped features on schedule with high-quality execution.
- Served as primary technical point of contact for US clients — gathered requirements, led technical demos, resolved escalations — consistently achieving CSAT scores of 9.5–10/10 through reliable communication and delivery.
- Deployed and maintained services using Docker and cloud environments (AWS/GCP), contributing to infrastructure setup for distributed test-like environments and service observability.

Web Developer Intern | **W3grads**

June 2024 – Aug 2024 • Remote

- Developed MEDIIHELP, a MERN stack telemedicine platform with React.js UI, integrating Zego Cloud API for real-time video calling — increasing user engagement by 30% and customer support efficiency by 40%.
- Implemented Firebase real-time chat, improved page load performance by 25% through client-side optimisation, and reduced account issues by 15% via JWT-based authentication and secure session management.
- Conducted root-cause analysis of system bottlenecks, isolated component-level issues vs. integration-level failures, and reported findings in structured test result summaries.

KEY PROJECTS

HireFloww — Enterprise HR Onboarding Portal

Jan 2026 – Mar 2026

- Architected a production-grade MERN platform with Role-Based Access Control (Super Admin / HR / Employee), real-time Socket.io chat engine, and Cloudinary document pipeline — designed for concurrent multi-user load and deployed on Vercel + Render.
- Implemented crypto-token email provisioning (Nodemailer) and Feature-Sliced Design architecture (features/, shared/, core/) — applied security analysis to close auth vulnerabilities and validated system behaviour under realistic user scenarios.
- Monitored live environment end-to-end; tracked performance metrics, resolved integration-level issues across auth, socket, and storage services, and benchmarked system behaviour under concurrent load.

Tech Stack: React 18, Node.js, Express.js, MongoDB Atlas, Socket.io, Nodemailer, Cloudinary, JWT, Tailwind CSS, Vercel, Render

Smart Serve — AI-Powered CRM Platform

Dec 2024 – Mar 2025

- Architected a full-stack CRM platform with React.js frontend and Node.js + Express.js + MongoDB Atlas backend, featuring customer segmentation, order management, and campaign automation — improving lead engagement by 35%.
- Built a bulk data import/export pipeline, integrated Nodemailer for automated email campaigns, and developed real-time data visualisation dashboards — cutting manual operations by 50%; benchmarked performance under simulated concurrent load.
- Integrated Google Gemini API for AI-driven CRM insights and smart recommendations; designed scalable backend architecture capable of handling concurrent users and high data throughput.

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, Gemini API, Nodemailer, Docker

Shalini Saree — E-Commerce Platform

Aug 2024 – Nov 2024

- Led end-to-end development of a React.js + Node.js + MongoDB Atlas e-commerce platform with keyword search, cart management, and order tracking — boosting user engagement by 40%.
- Designed an admin panel for product CRUD, inventory management, and analytics; implemented secure user authentication; conducted API performance testing and optimised query execution plans.

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB Atlas

CERTIFICATIONS

- Cloud Computing — Swayam NPTEL (Dec 2024)
- Server-side JavaScript with Node.js — Coursera

ACHIEVEMENTS

- Solved 300+ problems on LeetCode — demonstrating strong DSA, algorithmic thinking, and C++/Java problem-solving skills (Mar 2025).
- Consistently achieved CSAT scores of 9.5–10/10 while managing full-stack delivery for US enterprise clients at Kanerika Software Inc.
- 2nd Runner-up, Build-a-Thon by Apna College & Board Infinity (April 2024).
- Recommended for the Chief Minister's Award for Excellence in Academics and Problem-Solving (May 2022).

EDUCATION

B.Tech, Computer Science and Engineering | **Lovely Professional University, Punjab** 2022 – 2026 •

Phagwara, Punjab

CGPA: 8.4

12th Standard (Science) | **Namkhana Narayan Vidyamandir**

2020 – 2022 • Namkhana, WB

Percentage: 96%
